<https://github.com/JazzyLucas>

Summary

- 4+ years of programming experience specializing with Unity3D's C# Scripting API.
- Creator of mobile Android app "Voxel Vanquish: Tower Defense" (<https://lucas.games>)
- Code tutorial creator and contributor to the UNF Osprey Development Club
- Programmed school projects using Java, Python, and Objective-C (versatile with languages)
- 3+ years of 3D modeling experience using AutoCAD, NX 12.0, and Blender Software.
- 2+ years of experience in creating Network Attached Storage, using Virtual Private Servers, and basic linux commands.

Experience

Remote Private Tutor

iD Tech Camps

Apr 2021 - Aug 2021 (5 months)

Educated recurring STEM students remotely with iD Tech (Silicon Valley company).

Lesson subjects included Unity3D, Oculus Quest 2 VR Development, and C# Script Coding.

VR Game Developer

Resilience, Inc. - Social Emotional Learning Programs

Nov 2020 - Present (10 months +)

Collaborated with a team to create an SEL-VR game for use with Oculus devices. I focused on utilizing Unity's XR Framework and Scripting APIs (C#) to develop new features and provide optimizations for future-proofing.

Education

University of North Florida

B.S, Computer Science

2018 - 2022

ABET Accredited

Skills

C# • Unity • Object-Oriented Programming (OOP) • Java • AutoCAD • Blender • Siemens NX • Collaborative Problem Solving • GitHub • Python (Programming Language)

Honors & Awards

IEEE Xtreme 14 Competitor - IEEE

Aug 2019

Placed 24th in the nation with the team BirdProgrammers
